

Section A -- Financial Statistics

The tables in this section generally present data on financial operations under the Railroad Retirement and Railroad Unemployment Insurance Acts for fiscal year 2002 and for varying numbers of prior years.

December 2001 legislation contained several changes to the financing provisions of the Railroad Retirement Act. The new law provides for transfers of railroad retirement funds from the Railroad Retirement Accounts to a new National Railroad Retirement Investment Trust (NRRIT). The NRRIT is empowered to invest in non-governmental assets, such as equities and debt, as well as in governmental securities. The supplemental annuity work-hour tax was repealed effective January 2002, and supplemental benefits are paid from tier II taxes. As discussed below, the tier II tax rate was reduced in calendar years 2002 and 2003, and the law provides for automatic tier II tax rate adjustments beginning with calendar year 2004.

The main source of financing the railroad retirement program is a payroll tax paid by employers and employees. Railroad retirement taxes and benefits are paid on a two-tier basis. Employers and employees pay tier I taxes at the same rate as social security taxes, and the amount of earnings subject to the tax corresponds to the prevailing social security taxable maximum. Tier II taxes finance benefits payable over and above social security levels, but earnings subject to the tax are restricted to the social security taxable maximums which would have been applicable under continuation of pre-1977 social security law. Both employers and employees pay tier II taxes, but at different rates.

In calendar years 2001 and 2002, a tier I tax rate of 7.65 percent for employers and employees applied to compensation up to \$80,400 and \$84,900 per year, respectively. The tier I rates include taxes that finance the hospital insurance portion of Medicare; that tax rate for both employees and employers was 1.45 percent for 2001 and 2002. In the years 1991-1993, hospital insurance had an annual earnings base separate from that for tier I. Beginning in 1994, there is no limit to earnings subject to the hospital insurance portion of the tier I tax rate.

In calendar year 2001, the tier II tax rates paid by employers and employees were 16.10 percent and 4.90 percent, respectively, and were levied on annual earnings up to \$59,700. During 2002, tier II tax rates were 15.60 percent and 4.90 percent for employers and employees, respectively, on earnings up to \$63,000. The tier II tax rate for employers was lowered to 14.2 percent in calendar year 2003. Beginning in 2004, the tier II tax rate will be determined annually from a tax rate schedule based on the average account benefits ratio. The average account benefits ratio is the average for the 10 fiscal years preceding the calendar year of the ratio of the fair market value of the assets in the Railroad Retirement Account and the National Railroad Retirement Investment Trust as of the close of each fiscal year to the total benefits and administrative expenses paid from those accounts during the fiscal year. Employer tax rates can range from 8.2 percent to 22.1 percent. Employee tax rates can range from 0 percent to 4.9 percent.

Additional income is derived from Federal income taxes on tier I, tier II and vested dual benefits, from interest on invested funds and from the financial interchange with the social security system. The experience under the latter arrangement is presented in table A3. Under this arrangement, the social security trust funds are, in effect, credited with taxes received on railroad payrolls, and charged with the additional benefits and administrative costs they would have paid if railroad employment had been covered under the social security program. Financial interchange determinations are made jointly by the Board, the Social Security Administration, and the Centers for Medicare & Medicaid Services on an annual basis. Separate determinations are made with respect to the Old-Age and Survivors Insurance, Disability Insurance, and Hospital Insurance Trust Funds.

The railroad unemployment and sickness benefit programs are financed by contributions from railroad employers, based on a percentage of their employees' taxable earnings. In 2001 and 2002, the taxable earnings base for those programs was the first \$1,050 and \$1,100, respectively, of each employee's monthly earnings. Beginning in 1991, each employer's contribution rate is experience based.

Fiscal years begin October 1 of the prior calendar year and end September 30.

In the tables, detailed figures may not add to totals shown because of rounding.

¹ Benefit payments include a small amount of payments for hospital insurance benefits for services in Canada.

² Retirement benefits include vested dual benefit and supplemental annuity payments. Survivor benefits include vested dual benefit payments.

³ Includes extended unemployment benefits paid to claimants with less than 10 years of service and additional extended benefits to those with 10-14 years.

NOTE.-- Number of beneficiaries represents all individuals paid benefits in year. In total number for each year, beneficiaries are counted only once, even though they may have received more than one type of benefit. In fiscal year 2002, 10,400 individuals received both retirement and survivor benefits, 1,600 employees received both unemployment and sickness benefits, and 4,900 employees received benefits under both the Railroad Retirement Act and the Railroad Unemployment Insurance Act. These figures are partly estimated, and totals for earlier years are similarly adjusted.
